

read-out
rolls

a

Diagram 'a' shows a read-out roll (represented by a triangle) connected to a TN layer (represented by a rectangle). The connection is made by a line that goes from the right side of the read-out roll, up, and then right to the left side of the TN layer.

b

Diagram 'b' shows a read-out roll (represented by a triangle) connected to a TN layer (represented by a rectangle). The connection is made by a line that goes from the right side of the read-out roll, up, and then right to the left side of the TN layer.

c

Diagram 'c' shows a read-out roll (represented by a triangle) connected to a TW layer (represented by a rectangle). The connection is made by a line that goes from the right side of the read-out roll, up, and then right to the left side of the TW layer.
